I believe Kingsbridge and the South Hams in general is a special place and feel privileged to call it home. I am a professional engineer and worked as Engineering Manager in Engineering and Technology for a Blue Chip British Aerospace Company.

I am a Member of the Royal Aeronautical Society and am delighted to bring my skills to support Kingsbridge Town Council. I believe that we should work closely with various authorities to ensure that we look after and keep Kingsbridge a vibrant and safe town.

Over the last few years, I have been involved with the forming of Kingsbridge Estuary Boat Club and am currently Chairman of Kingsbridge in Bloom and am proud to say that the hardworking team have transformed and enhanced many parts of the town.

When not involved with horticulture and KB, I enjoy sailing and have a motor/sailing boat moored on the pontoon in the town which keeps me out of mischief.
